## [Automobile springs catalogue \(bi-lingual, PDF, 5,4 M6\)](#)

Springs play an important role in the construction of trucks. They relay the load from the frame or the body of the car onto the wheels.

In 2013, we were nominated by Volvo Group Purchasing to supply springs to Volvo's factory in Kaluga.

In addition to this, all sports KAMAZ trucks, which won the prestigious Paris-Dakar rally, were equipped with parabolic springs made in Chusovoy.
